Q23)Check if a given graph is tree or not

An undirected graph is tree if it has following properties.
1) There is no cycle.
2) The graph is connected.

Q24) Find K'th Smallest/Largest Element in Unsorted Array

```
public static int kthSmallest(Integer[] arr,
                              int k)
   {
      // Sort the given array
      Arrays.sort(arr);

      // Return k'th element in
      // the sorted array
      return arr[k - 1];
   }
```
Q25) How to find the shortest path between two nodes?

Dijkstra's algorithm finds a shortest path tree from a single source node, by building a set of nodes that have minimum distance from the source.
